1.Write the program for the following:

a. Create an application to print Floyd's triangle till n rows in C#.

b. Write C# code to arrange the name of cities in sorted order. Accept name of 10 cities from the user

---

a. Create an application to print Floyd's triangle till n rows in C#.

```
using System;

class Program
{
   static void Main()
   {
      int n, num = 1;

      Console.Write("Enter the number of rows: ");
      n = Convert.ToInt32(Console.ReadLine());

      for (int i = 1; i <= n; i++)
      {
         for (int j = 1; j <= i; j++)
         {
            Console.Write(num + " ");
            num++;
         }
         Console.WriteLine();
      }

      Console.ReadKey();
   }
}
```

Output:

```
Enter the number of rows: 5
1
2 3
4 5 6
7 8 9 10
11 12 13 14 15
```

b. Write C# code to arrange the name of cities in sorted order. Accept name of 10 cities from the user

Solution:

```
using System;

class Program
{
  static void Main()
  {
    string[] cities = new string[10];

    // Accept city names
    Console.WriteLine("Enter the names of 10 cities:");
    for (int i = 0; i < 10; i++)
    {
      Console.Write("City " + (i + 1) + ": ");
      cities[i] = Console.ReadLine();
    }

    // Sort the city names in ascending order
    Array.Sort(cities);

    // Display sorted city names
    Console.WriteLine("\nCities in Sorted Order:");
    foreach (string city in cities)
    {
      Console.WriteLine(city);
    }

    Console.ReadKey();
  }
}
```
